NMR Spectroscopy in Pharmaceutical Analysis

NMR Spectroscopy in Pharmaceutical Analysis

For almost a decade, quantitative NMR spectroscopy (qNMR) has been established as valuable tool in drug analysis. In all disciplines, i. e. drug identification, impurity profiling and assay, qNMR can be utilized.

Separation techniques such as high performance liquid chromatography, gas chromatography, super fluid chromatography and capillary electrophoresis techniques, govern the purity evaluation of drugs. However, these techniques are not always able to solve the analytical problems often resulting in insufficient methods. Nevertheless such methods find their way into international pharmacopoeias. Thus, the aim of the book is to describe the possibilities of qNMR in pharmaceutical analysis.

Beside the introduction to the physical fundamentals and techniques the principles of the application in drug analysis are described: quality evaluation of drugs, polymer characterization, natural products and corresponding reference compounds, metabolism, and solid phase NMR spectroscopy for the characterization drug substances, e.g. the water content, polymorphism, and drug formulations, e.g. tablets, powders. This part is accompanied by more special chapters dealing with representative examples. They give more detailed information by means of concrete examples.

- combines theory, techniques, and concrete applications-all of which closely resemble the laboratory experience
- considers international pharmacopoeias, addressing the concern for licensing
- features the work of academics and researchers, appealing to a broad readership

From reader reviews:

Bryant Kelly:

As people who live in the particular modest era should be upgrade about what going on or facts even knowledge to make them keep up with the era that is certainly always change and move forward. Some of you maybe will certainly update themselves by reading books. It is a good choice in your case but the problems coming to anyone is you don't know what one you should start with. This NMR Spectroscopy in Pharmaceutical Analysis is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

Theresa Villarreal:

The event that you get from NMR Spectroscopy in Pharmaceutical Analysis could be the more deep you excavating the information that hide in the words the more you get considering reading it. It doesn't mean that this book is hard to comprehend but NMR Spectroscopy in Pharmaceutical Analysis giving you excitement feeling of reading. The article author conveys their point in particular way that can be understood by anyone who read this because the author of this publication is well-known enough. This book also makes your personal vocabulary increase well. Making it easy to understand then can go with you, both in printed or e-book style are available. We advise you for having that NMR Spectroscopy in Pharmaceutical Analysis instantly.

Steve Henry:

This NMR Spectroscopy in Pharmaceutical Analysis tend to be reliable for you who want to be described as a successful person, why. The explanation of this NMR Spectroscopy in Pharmaceutical Analysis can be among the great books you must have is giving you more than just simple reading through food but feed a person with information that probably will shock your preceding knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions in e-book and printed types. Beside that this NMR Spectroscopy in Pharmaceutical Analysis giving you an enormous of experience like rich vocabulary, giving you test of critical thinking that could it useful in your day activity. So , let's have it and enjoy reading.

Mildred Kershner:

This NMR Spectroscopy in Pharmaceutical Analysis is great book for you because the content that is certainly full of information for you who also always deal with world and still have to make decision every minute. This kind of book reveal it data accurately using great organize word or we can say no rambling sentences included. So if you are read the idea hurriedly you can have whole info in it. Doesn't mean it only provides you with straight forward sentences but difficult core information with beautiful delivering sentences. Having NMR Spectroscopy in Pharmaceutical Analysis in your hand like keeping the world in your arm, data in it is not ridiculous one. We can say that no publication that offer you world with ten or fifteen moment right but this book already do that. So , this is good reading book. Hello Mr. and Mrs. active

do you still doubt that will?
