Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research)

Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research)

The present challenge in the treatment of tumors is to reduce the number of patients that still die as a result of primary tumors. Today, the percentage of such deaths remains high at 30%, even when all the common therapeutic methods, namely surgery, radiotherapy, and chemotherapy, are applied. In order to reduce this percentage, new types of radiation sources with a higher linear energy transfer have been introduced, such as neutrons and pions. Fractionation patterns have been modified and radiosensitizers have been applied to increase biological efficiency. Studies of the combined application of chemotherapy and radiotherapy have been made to find the best therapeutic effect. In the early 1970s biological findings confirmed the effect of hyperthermia on tumor cells. The first clinical studies on hyperthermia treatment demonstrated that it resulted in better local tumor control. Further application of this treatment modality showed that hyperthermia should be used in addition to radiotherapy and chemotherapy. Despite these encouraging results, hyperthermia has not been introduced into common clinical use, due primarily to technical problems. There are a number of methods of transferring heat into tumors; however, with regard to physical conditions, an optimum method has not yet been found. One of the reasons is that up to now we have had no reliable method of obtaining thermal mapping of all parts of the human body. Such measurements are required not only for dosimetric purposes but also for the regulation of a hyperthermic system.

From reader reviews:

Kathryn Kern:

Here thing why this specific Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) are different and trustworthy to be yours. First of all looking at a book is good nonetheless it depends in the content than it which is the content is as tasty as food or not.

Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) giving you information deeper since different ways, you can find any publication out there but there is no publication that similar with Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research). It gives you thrill reading through journey, its open up your own personal eyes about the thing in which happened in the world which is possibly can be happened around you. You can actually bring everywhere like in park, café, or even in your approach home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) in e-book can be your substitute.

Amanda Doss:

Beside this specific Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) in your phone, it may give you a way to get nearer to the new knowledge or facts. The information and the knowledge you are going to got here is fresh from the oven so don't be worry if you feel like an older people live in narrow town. It is good thing to have Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) because this book offers for your requirements readable information. Do you often have book but you don't get what it's all about. Oh come on, that wil happen if you have this inside your hand. The Enjoyable option here cannot be questionable, such as treasuring beautiful island. Use you still want to miss the item? Find this book in addition to read it from currently!

Linda White:

Do you like reading a book? Confuse to looking for your best book? Or your book ended up being rare? Why so many question for the book? But any kind of people feel that they enjoy intended for reading. Some people likes reading, not only science book but novel and Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) or others sources were given knowledge for you. After you know how the great a book, you feel desire to read more and more. Science reserve was created for teacher or perhaps students especially. Those ebooks are helping them to add their knowledge. In additional case, beside science guide, any other book likes Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) to make your spare time a lot more colorful. Many types of book like here.

Orville Hightower:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is composed or printed or created from each source this filled update of news. With this modern era like at this point, many ways to get information are available for you. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just looking for the Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) when you desired it?
