Programming Web Services with XML-RPC

Simon St. Laurent, Joe Johnston, Edd Dumbill, Dave Winer

Programming Web Services with XML-RPC Simon St. Laurent, Joe Johnston, Edd Dumbill, Dave Winer

Have you ever needed to share processing between two or more computers running programs written in different languages on different operating systems? Or have you ever wanted to publish information on the Web so that programs other than browsers could work with it? XML-RPC, a system for remote procedure calls built on XML and the ubiquitous HTTP protocol, is the solution you've been looking for. *Programming Web Services with XML-RPC* introduces the simple but powerful capabilities of XML-RPC, which lets you connect programs running on different computers with a minimum of fuss, by wrapping procedure calls in XML and establishing simple pathways for calling functions. With XML-RPC, Java programs can talk to Perl scripts, which can talk to Python programs, ASP applications, and so on. You can provide access to procedure calls without having to worry about the system on the other end, so it's easy to create services that are available on the Web. XML-RPC isn't the only solution for web services; the Simple Object Access Protocol (SOAP) is another much-hyped protocol for implementing web services. While XML-RPC provides fewer capabilities than SOAP, it also has far fewer interoperability problems and its capabilities and limitations are much better understood. XML-RPC is also stable, with over 30 implementations on a wide variety of platforms, so you can start doing real work with it immediately. *Programming Web Services with XML-RPC* covers the details of five XML-RPC implementations, so you can get started developing distributed applications in Java, Perl, Python, ASP, or PHP. The chapters on these implementations contain code examples that you can use as the basis for your own work. This book also provides in-depth coverage of the XML-RPC specification, which is helpful for low-level debugging of XML-RPC clients and servers. And if you want to build your own XML-RPC implementation for another environment, the detailed explanations in this book will serve as a foundation for that work.

From reader reviews:

Thomas Baldwin:

What do you in relation to book? It is not important to you? Or just adding material if you want something to explain what the ones you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make one feel bored faster. And you have time? What did you do? Every individual has many questions above. The doctor has to answer that question since just their can do that will. It said that about guide. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need this specific Programming Web Services with XML-RPC to read.

Suzanne Cicero:

Do you one of people who can't read pleasant if the sentence chained in the straightway, hold on guys this kind of aren't like that. This Programming Web Services with XML-RPC book is readable through you who hate the straight word style. You will find the data here are arrange for enjoyable reading through experience without leaving perhaps decrease the knowledge that want to offer to you. The writer connected with Programming Web Services with XML-RPC content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the articles but it just different in the form of it. So , do you even now thinking Programming Web Services with XML-RPC is not loveable to be your top listing reading book?

Mildred Olsen:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you never know the inside because don't ascertain book by its protect may doesn't work this is difficult job because you are scared that the inside maybe not while fantastic as in the outside search likes. Maybe you answer may be Programming Web Services with XML-RPC why because the wonderful cover that make you consider with regards to the content will not disappoint you. The inside or content will be fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.

Jeff Keenan:

Reading a reserve make you to get more knowledge as a result. You can take knowledge and information from a book. Book is composed or printed or created from each source in which filled update of news. On this modern era like now, many ways to get information are available for you actually. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just looking for the Programming Web Services with XML-RPC when you necessary it?
