Steve Jenkins

Bones: Skeletons and How They Work Steve Jenkins

Caldecott Honor winner Steve Jenkins presents a fascinating look at the bones of the human body as compared to the bones of animals, and shows them off!

This book is far from skinny -- it's the definitive nonfiction title about human and animal bones, delivered with in-your-face accuracy and intrigue. In this visually driven volume, kids come face-to-face with some head-to-toe boney comparisons, many of them shown at actual size. Here you'll find the differences between a man's hand and that of a spider monkey; the great weight of an elephant's leg, paired with the feather-light femur of a stork; and rib-tickling info about snakes and sloths. How many bones are in the whole human body?
