Bo Xing, Wen-Jing Gao

Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms: 62 (Intelligent Systems Reference Library) Bo Xing, Wen-Jing Gao

The first notable feature of this book is its **innovation**: Computational intelligence (CI), a fast evolving area, is currently attracting lots of researchers' attention in dealing with many complex problems. At present, there are quite a lot competing books existing in the market. Nevertheless, the present book is markedly different from the existing books in that it presents **new paradigms of CI** that have rarely mentioned before, as opposed to the traditional CI techniques or methodologies employed in other books. During the past decade, a number of new CI algorithms are proposed. Unfortunately, they spread in a number of unrelated publishing directions which may hamper the use of such published resources. These provide us with motivation to analyze the existing research for categorizing and synthesizing it in a meaningful manner. The mission of this book is really important since those algorithms are going to be a new revolution in computer science. We hope it will stimulate the readers to make novel contributions or even start a new paradigm based on nature phenomena. Although structured as a textbook, the book's straightforward, self-contained style will also appeal to a wide audience of professionals, researchers and independent learners. We believe that the book will be instrumental in initiating an integrated approach to complex problems by allowing cross-fertilization of design principles from different design philosophies.

The second feature of this book is its **comprehensiveness**: Through an extensive literature research, there are 134 innovative CI algorithms covered in this book.

From reader reviews:

Cory Marshall:

Do you have something that suits you such as book? The guide lovers usually prefer to pick book like comic, limited story and the biggest an example may be novel. Now, why not striving Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms: 62 (Intelligent Systems Reference Library) that give your pleasure preference will be satisfied by means of reading this book. Reading habit all over the world can be said as the method for people to know world much better then how they react to the world. It can't be explained constantly that reading habit only for the geeky man or woman but for all of you who wants to always be success person. So , for all you who want to start studying as your good habit, it is possible to pick Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms: 62 (Intelligent Systems Reference Library) become your current starter.

Jessica Jackson:

Beside this Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms: 62 (Intelligent Systems Reference Library) in your phone, it could possibly give you a way to get closer to the new knowledge or facts. The information and the knowledge you will got here is fresh from oven so don't become worry if you feel like an older people live in narrow community. It is good thing to have Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms: 62 (Intelligent Systems Reference Library) because this book offers to your account readable information. Do you often have book but you do not get what it's facts concerning. Oh come on, that won't happen if you have this within your hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss this? Find this book and read it from now!

Floyd Eichner:

That guide can make you to feel relax. This particular book Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms: 62 (Intelligent Systems Reference Library) was colorful and of course has pictures around. As we know that book Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms: 62 (Intelligent Systems Reference Library) has many kinds or style. Start from kids until teens. For example Naruto or Investigator Conan you can read and feel that you are the character on there. So , not at all of book are generally make you bored, any it offers up you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading that will.

Richard Broderick:

What is your hobby? Have you heard in which question when you got learners? We believe that that query was given by teacher with their students. Many kinds of hobby, All people has different hobby. So you know that little person like reading or as studying become their hobby. You have to know that reading is very important in addition to book as to be the factor. Book is important thing to add you knowledge, except your

current teacher or lecturer. You find good news or update concerning something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is niagra Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms: 62 (Intelligent Systems Reference Library).
