## Functional Organization of Vertebrate Plasma Membrane (Current Topics in Membranes)

*Current Topics in Membranes* is targeted toward scientists and researchers in biochemistry and molecular and cellular biology, providing the necessary membrane research to assist them in discovering the current state of a particular field and in learning where that field is heading. This volume covers recent breakthroughs in understanding the molecular and cellular basis for patterning vertebrate plasma membranes. A special emphasis is placed on physiological function with chapters covering signaling in the nervous system and heart, vision, and the immune system.

- consolidates subjects normally dispersed in the literature
- presents in one volume a subject that has undergone a recent molecular revolution
- authors are primary contributors and in some cases the founding figures in their fields
