Autecology: Organisms, Interactions and Environmental Dynamics

Gimme H. Walter, Rob Hengeveld

Autecology: Organisms, Interactions and Environmental Dynamics Gimme H. Walter, Rob Hengeveld

This book spells out the theoretical structure, methodology and philosophy of the science of autecology. The autecological approach focuses on the interactions of individual organisms (and their species-specific adaptations) with the spatio-temporal dynamics of their environment as a basis for interpreting patterns of diversity and abundance in natural systems. This organism-based approach to ecological interpretation provides a strong alternative to more traditional approaches and relates mechanistically to the underlying disciplines of anatomy, physiology, and behavior. The book includes illustrations, specific examples, graphs, maps, and other diagrams.
