## **Forest Analytics with R (Use R!)** Andrew P. Robinson

Forest Analytics with R combines practical, down-to-earth forestry data analysis and solutions to real forest management challenges with state-of-the-art statistical and data-handling functionality. The authors adopt a problem-driven approach, in which statistical and mathematical tools are introduced in the context of the forestry problem that they can help to resolve. All the tools are introduced in the context of real forestry datasets, which provide compelling examples of practical applications. The modeling challenges covered within the book include imputation and interpolation for spatial data, fitting probability density functions to tree measurement data using maximum likelihood, fitting allometric functions using both linear and non-linear least-squares regression, and fitting growth models using both linear and non-linear mixed-effects modeling. The coverage also includes deploying and using forest growth models written in compiled languages, analysis of natural resources and forestry inventory data, and forest estate planning and optimization using linear programming. The book would be ideal for a one-semester class in forest biometrics or applied statistics for natural resources management. The text assumes no programming background, some introductory statistics, and very basic applied mathematics.

### From reader reviews:

#### Steven Campbell:

Why don't make it to become your habit? Right now, try to prepare your time to do the important act, like looking for your favorite e-book and reading a guide. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled Forest Analytics with R (Use R!). Try to make book Forest Analytics with R (Use R!) as your friend. It means that it can for being your friend when you truly feel alone and beside those of course make you smarter than ever before. Yeah, it is very fortunate for you. The book makes you far more confidence because you can know every little thing by the book. So , we need to make new experience in addition to knowledge with this book.

#### Sandra McNulty:

Have you spare time for a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a go walking, shopping, or went to often the Mall. How about open or even read a book entitled Forest Analytics with R (Use R!)? Maybe it is to become best activity for you. You already know beside you can spend your time with your favorite's book, you can better than before. Do you agree with their opinion or you have different opinion?

#### Charles Barton:

This Forest Analytics with R (Use R!) is new way for you who has intense curiosity to look for some information given it relief your hunger of knowledge. Getting deeper you upon it getting knowledge more you know or you who still having little bit of digest in reading this Forest Analytics with R (Use R!) can be the light food for you personally because the information inside this book is easy to get by means of anyone. These books produce itself in the form that is certainly reachable by anyone, yep I mean in the e-book type. People who think that in guide form make them feel drowsy even dizzy this e-book is the answer. So there is not any in reading a e-book especially this one. You can find actually looking for. It should be here for a person. So , don't miss the item! Just read this e-book kind for your better life as well as knowledge.

#### Lyla Jackson:

Do you like reading a publication? Confuse to looking for your selected book? Or your book was rare? Why so many query for the book? But virtually any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but additionally novel and Forest Analytics with R (Use R!) or maybe others sources were given know-how for you. After you know how the good a book, you feel want to read more and more. Science e-book was created for teacher or students especially. Those textbooks are helping them to increase their knowledge. In some other case, beside science e-book, any other book likes Forest Analytics with R (Use R!) to make your spare time far more colorful. Many types of book like here.
