**Confucius in the Technology Realm: A Philosophical Approach to your School's Ed Tech Goals** Darryl Vidal

*Confucius in the Technology Realm* is a ground-breaking new approach to the dynamic world of Education Technology. In this work, the author has decided to soften on structure and focus on art - to take a philosophical approach to the planning and management of the chaotic and ever-changing realm of Educational Technology – what would Confucius think about Ed Tech? But while providing a method of inquiry for philosophical guidance, the book is also meant to reinforce the ethereal concepts with real-world, Ed Tech examples.

The ultimate objectives of impacting student learning and achievement and mastery of philosophical self-discipline becomes one and the same - thus, the Tao of Education Technology may be seen as Confucius' viewpoint, helping identify the path to transcending the organization's people, policies, and processes to attain a state where the whole is greater than the sum of its parts - where the education technology infrastructure and operational support structure are ingrained and embodied within the organization as a whole.
