McLean Screening Instrument For Borderline Personality Disorder (MSI-BPD) Mary C. Zanarini

The McLean Screening Instrument-BPD is a 10-item, yes/no, self-report patient screening scale. It is used with an undiagnosed population to identify people who need further evaluation for BPD. The scale demonstrates strong sensitivity (the degree to which it correctly identifies patients who do have the disorder), as well as strong specificity (the degree to which it correctly identifies patients who do not have the disorder).
