Applications of Algebra and Geometry to the Work of Teaching (IAS/PCMI - The Teacher Program Series) Bowen Kerins, Benjamin Sinwell, Darryl Yong, Al Cuoco, Glenn Stevens

Designed for precollege teachers by a collaborative of teachers, educators, and mathematicians, Applications of Algebra and Geometry to the Work of Teaching is based on a course offered in the Summer School Teacher Program at the Park City Mathematics Institute. But this book isn't a "course" in the traditional sense. It consists of a carefully sequenced collection of problem sets designed to develop several interconnected mathematical themes, and one of the goals of the problem sets is for readers to uncover these themes for themselves. The specific theme developed in Applications of Algebra and Geometry to the Work of Teaching is the use of complex numbers-especially the arithmetic of Gaussian and Eisenstein integers-to investigate some questions that are at the intersection of algebra and geometry, like the classification of Pythagorean triples and the number of representations of an integer as the sum of two squares. Applications of Algebra and Geometry to the Work of Teaching is a volume of the book series IAS/PCMI-The Teacher Program Series published by the American Mathematical Society. Each volume in that series covers the content of one Summer School Teacher Program year and is independent of the rest.

From reader reviews:

Betty Young:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to the Mall. How about open or even read a book called Applications of Algebra and Geometry to the Work of Teaching (IAS/PCMI - The Teacher Program Series)? Maybe it is to be best activity for you. You recognize beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with the opinion or you have some other opinion?

Lawrence Caulfield:

Reading a book tends to be new life style on this era globalization. With studying you can get a lot of information that could give you benefit in your life. Together with book everyone in this world could share their idea. Guides can also inspire a lot of people. Lots of author can inspire their particular reader with their story or their experience. Not only the storyplot that share in the textbooks. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on this planet always try to improve their talent in writing, they also doing some exploration before they write to the book. One of them is this Applications of Algebra and Geometry to the Work of Teaching (IAS/PCMI - The Teacher Program Series).

Harold Bunch:

Typically the book Applications of Algebra and Geometry to the Work of Teaching (IAS/PCMI - The Teacher Program Series) has a lot info on it. So when you make sure to read this book you can get a lot of advantage. The book was compiled by the very famous author. Tom makes some research just before write this book. That book very easy to read you can obtain the point easily after reading this book.

Oscar Jackson:

People live in this new morning of lifestyle always aim to and must have the spare time or they will get lot of stress from both everyday life and work. So , when we ask do people have time, we will say absolutely without a doubt. People is human not only a robot. Then we consult again, what kind of activity have you got when the spare time coming to you of course your answer will probably unlimited right. Then do you try this one, reading books. It can be your alternative throughout spending your spare time, the actual book you have read is usually Applications of Algebra and Geometry to the Work of Teaching (IAS/PCMI - The Teacher Program Series).
