Hangzhou Lectures on Eigenfunctions of the Laplacian (AM-188) (Annals of Mathematics Studies)

Christopher D. Sogge

Based on lectures given at Zhejiang University in Hangzhou, China, and Johns Hopkins University, this book introduces eigenfunctions on Riemannian manifolds. Christopher Sogge gives a proof of the sharp Weyl formula for the distribution of eigenvalues of Laplace-Beltrami operators, as well as an improved version of the Weyl formula, the Duistermaat-Guillemin theorem under natural assumptions on the geodesic flow. Sogge shows that there is quantum ergodicity of eigenfunctions if the geodesic flow is ergodic.

Sogge begins with a treatment of the Hadamard parametrix before proving the first main result, the sharp Weyl formula. He avoids the use of Tauberian estimates and instead relies on sup-norm estimates for eigenfunctions. The author also gives a rapid introduction to the stationary phase and the basics of the theory of pseudodifferential operators and microlocal analysis. These are used to prove the Duistermaat-Guillemin theorem. Turning to the related topic of quantum ergodicity, Sogge demonstrates that if the long-term geodesic flow is uniformly distributed, most eigenfunctions exhibit a similar behavior, in the sense that their mass becomes equidistributed as their frequencies go to infinity.

From reader reviews:

Barbara Barnes:

With other case, little people like to read book Hangzhou Lectures on Eigenfunctions of the Laplacian (AM-188) (Annals of Mathematics Studies). You can choose the best book if you want reading a book. Provided that we know about how is important the book Hangzhou Lectures on Eigenfunctions of the Laplacian (AM-188) (Annals of Mathematics Studies). You can add know-how and of course you can around the world by the book. Absolutely right, simply because from book you can realize everything! From your country right up until foreign or abroad you will end up known. About simple factor until wonderful thing you could know that. In this era, we can open a book or searching by internet device. It is called e-book. You can use it when you feel uninterested to go to the library. Let's go through.

Richard Delarosa:

Hangzhou Lectures on Eigenfunctions of the Laplacian (AM-188) (Annals of Mathematics Studies) can be one of your beginning books that are good idea. All of us recommend that straight away because this guide has good vocabulary that may increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to get every word into satisfaction arrangement in writing Hangzhou Lectures on Eigenfunctions of the Laplacian (AM-188) (Annals of Mathematics Studies) yet doesn't forget the main place, giving the reader the hottest along with based confirm resource details that maybe you can be one among it. This great information can drawn you into new stage of crucial considering.

Janet Kline:

As we know that book is significant thing to add our expertise for everything. By a reserve we can know everything we want. A book is a range of written, printed, illustrated or blank sheet. Every year was exactly added. This book Hangzhou Lectures on Eigenfunctions of the Laplacian (AM-188) (Annals of Mathematics Studies) was filled concerning science. Spend your free time to add your knowledge about your technology competence. Some people has distinct feel when they reading the book. If you know how big benefit of a book, you can experience enjoy to read a e-book. In the modern era like currently, many ways to get book that you simply wanted.

Herbert Gist:

Book is one of source of expertise. We can add our understanding from it. Not only for students but native or citizen will need book to know the update information of year in order to year. As we know those ebooks have many advantages. Beside all of us add our knowledge, can bring us to around the world. Through the book Hangzhou Lectures on Eigenfunctions of the Laplacian (AM-188) (Annals of Mathematics Studies) we can have more advantage. Don't one to be creative people? For being creative person must like to read a book. Just choose the best book that appropriate with your aim. Don't end up being doubt to change your life

at this time book Hangzhou Lectures on Eigenfunctions of the Laplacian (AM-188) (Annals of Mathematics Studies). You can more inviting than now.
