## **Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering)** Jia He, Chang-Su Kim, C.-C. Jay Kuo

This book focuses on interactive segmentation techniques, which have been extensively studied in recent decades. Interactive segmentation emphasizes clear extraction of objects of interest, whose locations are roughly indicated by human interactions based on high level perception. This book will first introduce classic graph-cut segmentation algorithms and then discuss state-of-the-art techniques, including graph matching methods, region merging and label propagation, clustering methods, and segmentation methods based on edge detection. A comparative analysis of these methods will be provided with quantitative and qualitative performance evaluation, which will be illustrated using natural and synthetic images. Also, extensive statistical performance comparisons will be made. Pros and cons of these interactive segmentation methods will be pointed out, and their applications will be discussed.

There have been only a few surveys on interactive segmentation techniques, and those surveys do not cover recent state-of-the-art techniques. By providing comprehensive up-to-date survey on the fast developing topic and the performance evaluation, this book can help readers learn interactive segmentation techniques quickly and thoroughly.

**From reader reviews:**

**Rosa Goldschmidt:**

Do you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try to pick one book that you just dont know the inside because don't assess book by its deal with may doesn't work is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside search likes. Maybe you answer is usually Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering) why because the excellent cover that make you consider with regards to the content will not disappoint you actually. The inside or content is actually fantastic as the outside or cover. Your reading sixth sense will directly assist you to pick up this book.

**Francis King:**

Reading a book to become new life style in this 12 months; every people loves to learn a book. When you learn a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. In order to get information about your analysis, you can read education books, but if you want to entertain yourself look for a fiction books, such us novel, comics, and soon. The Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering) provide you with a new experience in reading a book.

**Thomas Baier:**

In this period globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. Typically the book that recommended to you is Interactive Segmentation Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering) this e-book consist a lot of the information from the condition of this world now. This particular book was represented how can the world has grown up. The words styles that writer make usage of to explain it is easy to understand. The particular writer made some research when he makes this book. That's why this book acceptable all of you.

**Marcos Hawkins:**

Many people spending their period by playing outside having friends, fun activity having family or just watching TV the whole day. You can have new activity to enjoy your whole day by studying a book. Ugh, do you think reading a book can really hard because you have to take the book everywhere? It all right you can have the e-book, taking everywhere you want in your Smart phone. Like Interactive Segmentation

Techniques: Algorithms and Performance Evaluation (SpringerBriefs in Electrical and Computer Engineering) which is getting the e-book version. So , try out this book? Let's notice.
