Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) Sebastian Thrun, Wolfram Burgard, Dieter Fox
Probabilistic robotics is a new and growing area in robotics, concerned with perception and control in the face of uncertainty. Building on the field of mathematical statistics, probabilistic robotics endows robots with a new level of robustness in real-world situations. This book introduces the reader to a wealth of techniques and algorithms in the field. All algorithms are based on a single overarching mathematical foundation. Each chapter provides example implementations in pseudo code, detailed mathematical derivations, discussions from a practitioner's perspective, and extensive lists of exercises and class projects. The book's Web site, www.probabilistic-robotics.org, has additional material. The book is relevant for anyone involved in robotic software development and scientific research. It will also be of interest to applied statisticians and engineers dealing with real-world sensor data.

From reader reviews:

Earline Martin:

The experience that you get from Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) will be the more deep you searching the information that hide in the words the more you get enthusiastic about reading it. It does not mean that this book is hard to understand but Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) giving you joy feeling of reading. The article writer conveys their point in certain way that can be understood simply by anyone who read that because the author of this e-book is well-known enough. This kind of book also makes your personal vocabulary increase well. Therefore it is easy to understand then can go together with you, both in printed or e-book style are available. We propose you for having this Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) instantly.

Larry Hunter:

Do you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Try to pick one book that you just dont know the inside because don't judge book by its include may doesn't work at this point is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside seem likes. Maybe you answer may be Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) why because the fantastic cover that make you consider about the content will not disappoint an individual. The inside or content is fantastic as the outside or even cover. Your reading 6th sense will directly assist you to pick up this book.

Austin Lawrence:

Don't be worry should you be afraid that this book can filled the space in your house, you will get it in e-book technique, more simple and reachable. That Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) can give you a lot of buddies because by you taking a look at this one book you have thing that they don't and make a person more like an interesting person. This book can be one of a step for you to get success. This guide offer you information that possibly your friend doesn't learn, by knowing more than some other make you to be great men and women. So , why hesitate? Let me have Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series).

Ralph Overman:

That guide can make you to feel relax. This particular book Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) was bright colored and of course has pictures on there. As we know that book Probabilistic Robotics (Intelligent Robotics and Autonomous Agents series) has many kinds or genre. Start from kids until teens. For example Naruto or Investigator Conan you can read and believe that you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book for you and try to like reading in which.
