System Simulation Techniques with MATLAB and Simulink

Dingyü Xue, YangQuan Chen

System Simulation Techniques with MATLAB and Simulink Dingyü Xue, YangQuan Chen
System Simulation Techniques with MATLAB and Simulink comprehensively explains how to use MATLAB and Simulink to perform dynamic systems simulation tasks for engineering and non-engineering applications.

This book begins with covering the fundamentals of MATLAB programming and applications, and the solutions to different mathematical problems in simulation. The fundamentals of Simulink modelling and simulation are then presented, followed by coverage of intermediate level modelling skills and more advanced techniques in Simulink modelling and applications.

Finally the modelling and simulation of engineering and non-engineering systems are presented. The areas covered include electrical, electronic systems, mechanical systems, pharmacokinetic systems, video and image processing systems and discrete event systems. Hardware-in-the-loop simulation and real-time application are also discussed.

Key features:

- Progressive building of simulation skills using Simulink, from basics through to advanced levels, with illustrations and examples
- Wide coverage of simulation topics of applications from engineering to non-engineering systems
- Dedicated chapter on hardware-in-the-loop simulation and real time control
- End of chapter exercises
- A companion website hosting a solution manual and powerpoint slides

System Simulation Techniques with MATLAB and Simulink is a suitable textbook for senior undergraduate/postgraduate courses covering modelling and simulation, and is also an ideal reference for researchers and practitioners in industry.

From reader reviews:

Frederick Rothman:

The knowledge that you get from System Simulation Techniques with MATLAB and Simulink will be the more deep you rooting the information that hide inside words the more you get interested in reading it. It does not mean that this book is hard to recognise but System Simulation Techniques with MATLAB and Simulink giving you joy feeling of reading. The article author conveys their point in specific way that can be understood by simply anyone who read it because the author of this book is well-known enough. This book also makes your vocabulary increase well. Making it easy to understand then can go together with you, both in printed or e-book style are available. We advise you for having this particular System Simulation Techniques with MATLAB and Simulink instantly.

Emily Meredith:

Typically the book System Simulation Techniques with MATLAB and Simulink has a lot of knowledge on it. So when you check out this book you can get a lot of help. The book was authored by the very famous author. Tom makes some research previous to write this book. This specific book very easy to read you may get the point easily after looking over this book.

Beth Call:

People live in this new time of lifestyle always try to and must have the spare time or they will get wide range of stress from both way of life and work. So , once we ask do people have extra time, we will say absolutely yes. People is human not really a huge robot. Then we inquire again, what kind of activity do you possess when the spare time coming to a person of course your answer can unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, typically the book you have read is definitely System Simulation Techniques with MATLAB and Simulink.

Denise Swann:

Many people spending their time period by playing outside having friends, fun activity along with family or just watching TV the entire day. You can have new activity to shell out your whole day by reading through a book. Ugh, ya think reading a book really can hard because you have to take the book everywhere? It okay you can have the e-book, taking everywhere you want in your Smart phone. Like System Simulation Techniques with MATLAB and Simulink which is having the e-book version. So , why not try out this book? Let's notice.
