Infrastructure Planning and Management: Proceedings of Two Parallel Conferences Jonathan L. Gifford, Donald R. Uzarski

This proceedings, "Infrastructure Planning and Management", consists of papers presented at two parallel conferences held in Denver, Colorado, June 21-23, 1993. Part I covers a wide range of issues, research, and applications in the area of infrastructure management. Some of these are: Automated assessment of conditions; implementation of management systems; improvement of infrastructures; application of neural networks and geographic information systems; and modeling of deterioration. The second part of the proceedings explores the issue of uncertainty in infrastructure planning. It covers such topics as: private sector investment; fuzzy set theory; land usage/transportation modeling; digital imaging; real-time traffic control; and life-cycle benefit analysis. Both sections present case studies relevant to the issues discussed. This collection of papers provides engineers, planners, and technicians with a current comprehensive look at available and emerging technologies within the general area of infrastructure planning and management.
