Modern Chinese Warplanes: Combat Aircraft and Units of the Chinese Air Force and Naval Aviation

Andreas Rupprecht, Tom Cooper

Much of the fascination that Chinese military aviation holds for the analyst and enthusiast stems from the thick veil of secrecy that surrounds it. This uniquely compact yet comprehensive directory serves as a magnificently illustrated, in-depth analysis and directory of modern Chinese air power. It is organized in three parts: the most important military aircraft and their weapons found in Chinese service today; aircraft markings and serial number systems; and orders of battle for the People's Liberation Army Air Force and Naval Air Force. The study includes the latest developments emerging from behind the 'Bamboo Curtain', including the J-20 stealth fighter program and other indigenous projects that are equipping a rapidly modernizing air arm. The centerpiece consists of almost 100 fully illustrated pages detailing the organizational structure of the Air Force and Naval Aviation, providing an easy-to-use review of all known flying units, their equipment and their markings. No other book has ever attempted to present this level of accuracy in this way: 'Modern Chinese Air Power' portrays the PLAAF and the PLANAF in a degree of detail that was previously unavailable.
